

# G2 Road Test Checklist

---

This checklist covers the tasks and actions you will be expected to perform during your G2 road test. Make sure to review and practice each component to ensure successful completion of the test.

## Left and Right Turns

- Traffic check (mirrors, blind spots)
- Move to correct lane for the turn
- Signal before slowing down for the turn
- Reduce speed as you approach the turn
- Maintain a safe space while slowing down
- Make a complete stop if needed
- Check for traffic before turning
- Turn into the correct lane without crossing markings
- Return to normal traffic speed after completing the turn

## Stop Intersection

- Traffic check before approaching intersection
- Slow down gradually
- Stop behind the stop line or crosswalk
- Check traffic before proceeding
- Use both hands on the wheel through the intersection
- Do not change gears or lanes while crossing
- Accelerate smoothly to return to normal speed

## Freeway Driving

- Check traffic before merging

- Signal before merging onto the freeway
- Maintain a safe following distance
- Increase speed to match freeway traffic
- Merge smoothly into the nearest lane
- Check traffic around you while driving along
- Avoid exceeding the speed limit
- Maintain space around your vehicle
- Signal before exiting the freeway
- Stay in lane while exiting, reduce speed safely

### Lane Changes

- Check mirrors and blind spots before changing lanes
- Signal early before changing lanes
- Maintain a safe following distance
- Change lanes smoothly without disrupting traffic
- Cancel signal after completing the lane change

### Roadside Stop

- Check mirrors and traffic before stopping
- Signal before pulling over
- Stop parallel to the curb, within 30 cm
- Turn on hazard lights
- Use the correct gear to park and set parking brake
- Check mirrors and blind spots before resuming
- Signal and merge back into traffic smoothly

### Three-Point Turn

- Check mirrors and traffic before turning
- Signal before stopping
- Turn slowly and smoothly, use the whole road
- Check traffic before each movement
- Complete the turn without reversing multiple times
- Return to normal traffic speed after completing the turn

### Parallel Parking

- Check mirrors and blind spots before stopping
- Signal before positioning to park
- Stop parallel to the vehicle in front of the parking space
- Check mirrors and blind spots before backing up
- Steer into the parking space smoothly
- Adjust position if necessary without hitting the curb
- Check traffic before exiting the parking space
- Signal and merge back into traffic smoothly
